E 10	<i>Chrysactinia mexicana</i>	Damianita	May-November	yellow
E 20	<i>Salvia microphylla 'Red Velvet'</i>	Little-leaf Sage	May-November	deep red

Cultural Notes: The perennials are grown in full sun (6 - 8 hours) in raised beds which vary in height from 6 to 24 inches. The soil is primarily clay mixed with composted organic matter. A three-inch layer of mulch helps retain moisture and inhibit weed growth, and an automatic irrigation system provides water to the plants. Tarrant County Master Gardeners and Garden volunteers weed, prune, and otherwise maintain the plantings three times a month. They also evaluate the perennials once a month, recording detailed data on each plant's growth, performance and overall landscape appeal. At the end of the year that data is analyzed to produce this list.
