

CORPORATE MEMBERSHIP

Commit to wellness for your employees, sustainability leadership for your company, and love for nature.

The Fort Worth Botanic Garden is your local connection to nature. It is centrally located in the 12th largest city in the country, but feels like you're stepping into a different world. Enable your employees to experience self-care by unplugging and unwinding in the oasis that is the FWBG. Our living museum welcomes more than 400,000 guests each year. The 120-acre campus offers respite and peace for guests of all ages and demographics. We seek to welcome a large and diverse audience. We hope to explore, discover, and engage with you and your team.

Time spent in nature is transformative and will contribute to your employees' whole health.
